SUMMARY

I am a front-end developer with over four years of experience in designing and developing web applications using modern technologies and frameworks. I specialize in creating user-friendly, responsive, and visually appealing interfaces that enhance user experience. With a strong understanding of UI/UX principles, performance optimization, and accessibility, I strive to deliver high-quality solutions that meet client expectations. I am always eager to explore new front-end tools and technologies to stay ahead in the ever-evolving web development landscape.

WORK EXPERIENCE

Software Developer, National Informatics Centre

Dec 2023 - Current

As a development manager, I am responsible for leading a distributed team of developers who work on various backend services for our products. I collaborate with the product team to ensure that we have clear and consistent requirements, and I communicate with the project management team to keep them updated on our progress and challenges. I also work closely with the architecture team and the front-end development team to design and implement solutions that meet the needs of our customers and stakeholders. Additionally, I participate in all grooming and priority setting sessions with stakeholders to identify and prioritize the features and functionality of our backend services.

Full Stack Developer, Ensaar Global Private Limited

Mar 2021 - April 2023

Developed and implemented a new API, resulting in a 25% reduction in load times and a 15% increase in user engagement. Collaborated with UX designers to create a new user interface, resulting in a 20% increase in user satisfaction and a 10% increase in conversion rates. Managed the software development life cycle for a major project, ensuring timely delivery and meeting all project milestones. Developed and maintained a scalable microservices architecture, improving system reliability by 40% and supporting a 20% increase in customer base. Wrote clean, testable code with unit tests, resulting in a 30% reduction in bug related delays and a 25% increase in overall code quality.

Web Developer, Round Pay

Aug 2019 - May 2020

Collaborated with a team of designers and back-end developers to create a cohesive user experience for a real estate web application, leading to a 40% increase in user engagement. Utilized front-end technologies such as jQuery and AJAX to integrate with backend services, resulting in real-time data-driven updates to the website and an improved user experience. Improved the speed and scalability of a social media website, leading to a 30% decrease in loading times and an increase in user satisfaction ratings. Developed a new e-commerce website using WordPress and Bootstrap, resulting in a 50% increase in sales and a 75% decrease in bounce rates.

EDUCATION & CERTIFICATIONS

Bachelor of Technology in Computer Science Engineering

Hindustan College of Science & Technology, Mathura

Web Design & Development Certification, Udemy

MERN Stack Certification, Udemy

KEY SKILLS

Front End Development - HTML, CSS, JS

Back End Development - NodeJS, Python

Database Management - MongoDB, My SQL

Version Control - Github, GIT

Frameworks - React, Angular, Express, Next

Others - Redis, Socket, ChartJs
